VGU - CSE2022

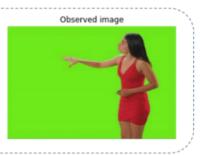

Exercise 5 - Project

October 20, 2022

Write a function to performed background subtraction, as illustrated following

- Library to read an image:
 - https://github.com/nothings/stb/blob/master/stb_image.h
- Library to write an image:

https://github.com/nothings/stb/blob/master/stb_image_write.h

• Test image:

https://raw.githubusercontent.com/neko941/BALOS/main/images/98239648_p0.png

• Directory structure:

headers
stb_image.h
stb_image_write.h
images
98239648_p0.png
main.c

VGU Programming 1

• Example codes using std library for reading and writing an image:

```
1 /// Ofile main.c
2 #include <stdio.h>
4 #define STB_IMAGE_IMPLEMENTATION
5 #include "./headers/stb_image.h"
6 #define STB_IMAGE_WRITE_IMPLEMENTATION
7 #include "./headers/stb_image_write.h"
9 /**
* Delete a quarter of the image
   * Oparam[in] image the input image
11
   * @param[in] width the width of the image
   * @param[in] height the height of the image
13
* Cparam[in] channel the channel of the image
15 */
16 unsigned char mask_image(unsigned char *image, int width, int height, int channel
17 {
      for (int i = 0; i < height / 2; i++)</pre>
18
19
           for (int j = 0; j < width / 2; j++)
20
21
               for (int k = 0; k < channel; k++)
22
23
                   image[i * width * channel + j * channel + k] = 0;
24
25
           }
26
      }
27
28 }
29
30 int main()
31 {
      // declare variables
32
      int width, height, channel;
33
       char path_img[] = "./images/98239648_p0.png";
34
       char save_path[] = "./images/98239648_p0-New.png";
36
      // read image data
37
      unsigned char *image = stbi_load(path_img, &width, &height, &channel, 0);
38
      if (image == NULL)
39
40
41
           printf("\nError in loading the image\n");
           exit(1);
42
43
      printf("Width = %d\nHeight = %d\nChannel = %d\n", width, height, channel);
44
45
      // fill image with black pixels
46
      mask_image(image, width, height, channel);
47
       // save image
49
       stbi_write_png(save_path, width, height, channel, image, width * channel);
50
      printf("New image saved to %s\n", save_path);
51
52 }
53
```

Code Listing 1: Delete a quarter of the image

VGU Programming 1

```
1 /// @file main.c
